Excerpts have been selected from the following books and essays: John Ruskin, *The Seven Lamps of Architecture*; Bernard Berenson, *Aesthetics and History in the Visual Arts*; Clive Bell, *The Aesthetic Hypothesis*; Cesare Brandi, *Theory of Restoration*; Kenneth Clark, *Looking at Pictures*; Erwin Panofsky, *The History of Art as a Humanistic Discipline*; E. H. Gombrich, *Art and Illusion*; Marie Cl. Berducou, *The Conservation of Archaeology*; and Paul Philippot, *Restoration from the Perspective of the Social Sciences*. The fully illustrated book also contains an annotated bibliography and an index.

The physics of condensed matter, in contrast to quantum physics or cosmology, is not traditionally associated with deep philosophical questions. However, as science largely thanks to more powerful computers becomes capable of analysing and modelling ever more complex many-body systems, basic questions of philosophical relevance arise: questions about the emergence of structure, the nature of cooperative behaviour, the implications of the second law, the quantum-classical transition, and many other issues. This book is a collection of essays by leading physicists and philosophers, each investigating one or more of these issues, making use of examples from modern condensed matter research. Physicists and philosophers alike will find surprising and stimulating ideas in these pages.

This anthology provides a collection of new essays on ethical and philosophical issues that concern the development, dispensing, and use of pharmaceuticals. It brings together critical ethical issues in pharmaceuticals that have not been included in any collection, e.g. the ethics of patients as researchers. In addition, it includes philosophical issues that are not within the traditional domain of applied ethics, for example, a game-theoretic approach to combating the emergence of antibiotic-resistant pathogens by spreading altruism. A tripartite distinction provides an organized series of discussions that shows the interrelatedness of philosophical issues from the creation of pharmaceuticals, the creation of demand for them through their delivery to their ultimate consumption.
